Section 4. Omitted information

Disclosure of type of information omitted		
Information omitted	**Information omitted, other tax jurisdictions**	**Explanation of reason for omission of information**
Not applicable	Not applicable	Not applicable
Disclosure of information omitted for previous financial years		
Not applicable		

Section 5. Explanations for material discrepancies between income tax paid and accrued

Explanation of any material discrepancies between income tax paid and accrued
Differences between income tax paid and income tax accrued are to be expected. Income tax accrued represents the income tax expense recognized for the current fiscal year based on taxable profit, whereas income tax paid may include current-year estimated tax installments, final settlements or refunds relating to prior periods, and amounts arising from tax authority audits or examinations of earlier tax filings.

Conclusion

This public Country-by-Country Report ("pCbCR") is based on information derived from Applied Materials, Inc.'s fiscal year 2025 consolidated financial statements prepared under U.S. GAAP as presented in Form 10-K. Consistent with the OECD BEPS Action 13 Country-by-Country Reporting framework, Applied Materials, Inc., as the Ultimate Parent Entity, files a CbCR with its U.S. tax return. Due to differences in reporting scope, aggregation requirements, and accounting standards, the information presented in this pCbCR may not be directly comparable to the Company's consolidated financial statements (Form 10-K), the statutory financial statements of individual constituent entities, or similar disclosures made by other multinational groups. In particular, the country-by-country reporting framework differs significantly from standard accounting principles, including consolidation and the elimination of intercompany transactions. As a result, profit figures may appear relatively high. In addition, taxes paid and accrued are based on taxable profits as defined under local tax legislation and may therefore differ significantly from the profit measure reported for country-by-country reporting purposes. Accordingly, the data should be considered in the context of the applicable reporting methodology, as standalone analysis of individual jurisdictions may not reflect the full operational and accounting context and could result in misleading interpretations. As publicly disclosed, Applied Materials Europe B.V. held minority interests in BE Semiconductor Industries N.V. and Kokusai Electric Corp., of which certain results may be exempt under the Dutch participation exemption regime, which exemption may lead to differences between the jurisdictional taxable profit and the profit data in country-by-country reporting.
